

ATLAS CRACK FILLER (GYPTEC)

DESCRIPTION:

Gyptec, is a gypsum-based product for filling cracks and cavities in walls. It can also be used as a skimming material to give a smooth surface prior to painting. *Gyptec* contains a cellulose derivative, which improves cohesive strength and promotes adhesion to ceiling boards, plaster, lime, cement and wood.

USES:

Gyptec Crack filler is highly effective smooth filler for all interior applications to repair cracks & holes in plaster, brick, and wood, concrete & asbestos fiber board.

FEATURES:

- The product is specially formulated to produce a high compressive strength and excellent adhesion under most conditions.
- It mixes easily with water to a lump-free and slump resistant paste which can be troweled to a smooth finish.
- When mixed has a working time of 45 minutes.
- Filling cracks, slits, cavities and gaps on walls and woodwork

LIMITATIONS:

- Not suitable for repairing of structural faults (foundation movements)
- Not suitable for the repair of small indentations (will dry too fast)
- Not suitable for repairing cracks on flexible

PRODUCT INFORMATION:

Appearance	Free Flowing Powder
Colour	Off White
Mass Solid	100 %
Specific Gravity	2.6 (Typical)
Application Temp.	5°C - 35°C
Drying Time	Max. 24 Hours
Pot Life	Approx. 4 Hours
